SERGEI RIABOV

Senior DevOps/SRE engineer

Hi everyone! My name is Sergei Riabov, and I am an engineer with nearly 7 years of experience in ensuring the reliability of web services, as well as implementing and supporting processes in software development. I had the opportunity to work in large companies. For the past 4 years I have been leading teams of engineers as well as responsible for the performance and availability of high-load services.

My strong points:

- Leadership in SRE and DevOps: I have been leading teams that focus on keeping websites and systems working well.
- Handling Big Challenges: I got used to dealing with the tech side of big companies.
- Smart Problem Solver: I like solving puzzles, especially when it comes to making technology work better. I make sure that the solutions I come up with not only fix the immediate problem but also help to improve business.
- Always Learning: I'm keeping up with the latest trends and tools. That is why I can bring the best and the newest ideas to the teams I work with.

PROFESSIONAL EXPERIENCE

Observability team lead, LLC PositiveTechnologies / Moscow, Russia (remote)

Jun 2023 - Now

- Management of the team of engineers, responsible for the implementation of unified modern solutions for collecting metrics and logs.
- Development of the design of a unified monitoring and log collection system based on the best modern practices and security requirements.
- Writing documentation and software development requirements, implementing unified processes in development and infrastructure.
- Development of the custom solutions for collecting metrics (exporters, service discovery automation).
- Development of the Ansible roles for observability infrastructure automation.

Tech stack: VictoriaMetrics, InfluxDB, Grafana, Consul, Golang, Ansible, Terraform

DevOps/SRE team lead, LLC CityMobil / Moscow, Russia (remote)

Feb 2021 - Nov 2023

- Management of the team of 6 engineers.
- Maintaining availability and performance of high-load taxi marketplace services.
- Maintaining DWH services such as Exasol, Clickhouse, Airflow, e.t.c.
- Support and acceleration of delivery of program code to all environments.
- Development of the design and implementing of a unified monitoring and incident management system.
- Development of the Ansible roles for observability infrastructure automation.

Tech stack: VictoriaMetrics, Grafana, Consul, Golang, Exasol, ClickHouse, MySQL, PostgreSQL, Redis, Gitlab, Ansible, Kubernetes

Senior site reliability engineer, LLC ATOL / Moscow, Russia

May 2017 - Feb 2021

- Maintaining availability and performance of high-load services.
- Maintaining and acceleration of delivery of program code to all environments.
- Implementing best practices of DevOps.
- Problem solving and incident management in all environments.
- Ensuring fault tolerance and availability of infrastructure and product services.
- Leading a project to migrate services from GCP to our own infrastructure.

Tech stack: Prometheus, Zabbix, Grafana, Consul, Python, MySQL, PostgreSQL, Redis, Gitlab, Saltstack, Google Cloud Platform
